

PRACTICAL AI FOR EVERYDAY LIFE

MODULE 1 WORKBOOK

Understand AI | August 2026 | Lessons 1-12

YOUR WORKBOOK

Name: _____

Start date: _____

One skill I want to build: _____

Start small. Ask clearly. Review carefully. Verify what matters.

Meet AI in Everyday Life

Lessons 1-3 | Recognition, awareness, and one safe first task

Plain-language reminder

AI is a digital tool that finds patterns and produces likely responses. It can be helpful without being human, magical, or always correct.

1. Explain AI

Write a one- or two-sentence explanation for a friend who has never used AI.

2. AI Around Me Inventory

List three apps or services, the feature that may use AI, and how that feature helps or influences you.

3. Choose a First Task

Name one familiar, low-risk task. Explain how you will review the result before using it.

Benefits, Limits, and Safe Use

Lessons 4-6 | Privacy, verification, and human judgment

QUICK CLASSIFICATION

Benefits or limitations?

- ☐ Turns rough notes into a checklist - benefit or limitation?
- ☐ May invent a believable source - benefit or limitation?
- ☐ Can explain a topic more simply - benefit or limitation?
- ☐ May miss context or reflect bias - benefit or limitation?

Safe, Edit First, or Do Not Share

Classify: a general grocery list; a budget with account numbers; a password-strength request containing the password; confidential client records.

When should you slow down?

Name one AI task you would use normally and one involving health, rights, money, safety, eligibility, or private data that requires an official source or qualified person.

Build a Better Prompt

Lessons 7-9 | Patterns, changing responses, and clear instructions

Prompt formula

Task + Context + Format + Limits reduces guesswork. It improves usefulness, but important claims still need verification.

TASK

What exactly should the AI do? Start with an action such as summarize, rewrite, compare, plan, or explain.

CONTEXT

What background, audience, or purpose does it need? Use placeholders instead of private details.

FORMAT

How should the answer be presented: bullets, email, checklist, table, or steps?

LIMITS

Set tone, length, must-include details, exclusions, and what the AI should label rather than invent.

Notice AI and Build One Habit

Lessons 10-12 | Everyday tools, realistic benefits, and routine

Audit One Familiar App

Record the app, likely AI feature, benefit, data it may use, and one privacy or personalization setting to review.

CHOOSE ONE

Which benefit would help most?

- | | |
|--|---|
| ☐ Save time | ☐ Generate ideas |
| ☐ Improve writing | ☐ Learn more clearly |
| ☐ Stay organized | |

Create a One-Week Habit

Name the task, your starter prompt, when you will use it, and the facts or details you will double-check.

Keep yourself in control

A useful habit should save time without weakening understanding. Change or stop the routine if it creates confusion or extra work.

Your Practical AI Action Plan

Complete after Lessons 1-12

TWELVE LESSONS

Completion check

- | | |
|--|---|
| ☐ 1. What Is AI? | ☐ 7. How AI Learns |
| ☐ 2. Where AI Already Appears | ☐ 8. Why Responses Change |
| ☐ 3. First Easy Uses | ☐ 9. Better Prompts |
| ☐ 4. Benefits vs. Limitations | ☐ 10. AI in Everyday Tools |
| ☐ 5. Using AI Safely | ☐ 11. Benefits of AI |
| ☐ 6. When to Slow Down | ☐ 12. First AI Habit |

My Reusable Prompt

Write one prompt you want to keep using. Include task, context, format, and limits.

My Review Rules

What will you always check before using, sharing, or acting on an AI response?

My Next Small Step

Name one low-risk action you will take during the next seven days.
